

Known-parameter Poisson counts: 32 rows, $P \leq 0.05$
1000 independent datasets / condition; 1000 fit + 999 test draws; exact 95% binomial intervals

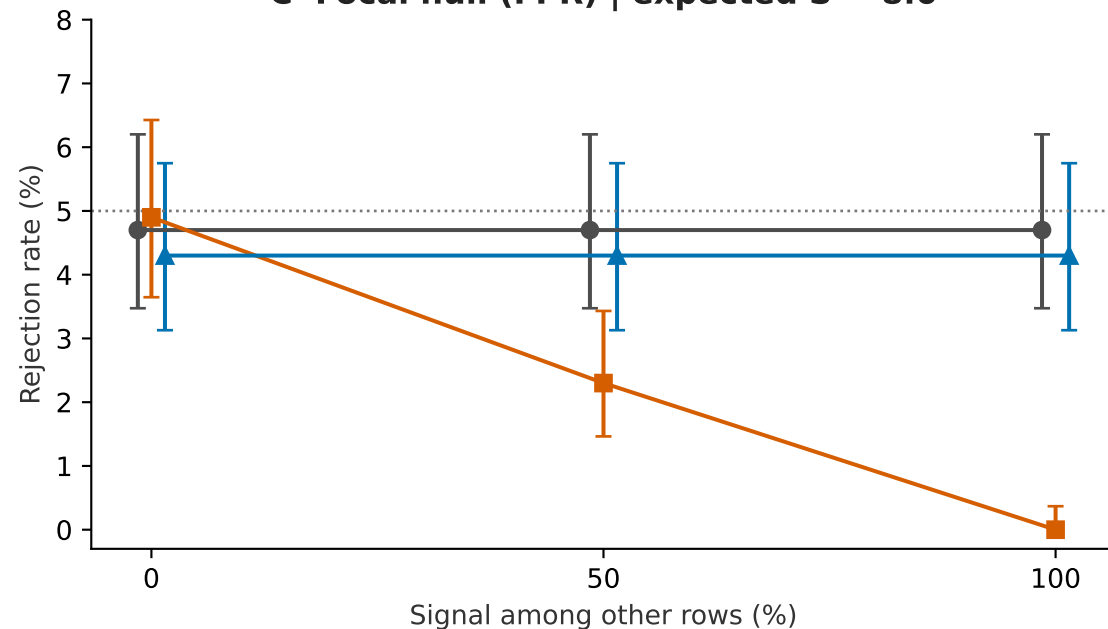

A Focal null (FPR) | expected $S = 0.5$

B Focal N x4 (power) | expected $S = 0.5$

C Focal null (FPR) | expected $S = 8.0$

D Focal N x4 (power) | expected $S = 8.0$
